***Karl Bodmer's North American Prints* By Karl Bodmer**

"Bodmer . . . wandered with the prince [Maximilian] for 13 months up the Missouri River, and the drawings and watercolors he made of what he saw . . . are the visual equivalent of Lewis and Clark's journals. As Ron Tyler

points out in his introductory essay to the meticulously illustrated Karl Bodmer's North American Prints, edited by Brandon K. Ruud, Bodmer arrived at a time when Europeans, besotted with fantasies of James Fenimore Cooper, had no idea what Indians really looked like. This volume documents in rich detail the popular diffusion—by engravings and lithographs—of Bodmer's original designs."—New York Times Book Review, Holiday Gift Books List.
